

SUCCESS STORY

# PV Modules to Malawi, Africa

## CHALLENGE

Project Navigator, Ltd. (PNL) was approached by a client who had 15,000 photovoltaic (PV) solar modules in storage in California and was seeking a plan to donate the functional, but dated, modules.

*Could PNL help via the expertise and relationships within PVNavigator, LLC?*

## SOLUTION

Working with William Kamkwamba of *Moving Windmills* during a 2-year process starting in 2019, PNL planned, managed and stewarded the shipment of the PV modules from California, via Dar Es Salaam, Tanzania to Kasungu, Malawi...where the modules are now being put back into productive use to power structures and water delivery systems.

*The long journey from Stockton, CA, via Panama Canal to Suez Canal to Dar Es Salam (Tanzania), then overland to Kasungu, Malawi.*

## RESULTS

*PV solar modules used to power schools, homes and water delivery systems for communities in Kasungu, Malawi.*
